

Dr. Khalil Al Hanashi is a Senior Advisor for Studies and Research within the Directorate General of Renewables and Hydrogen at the Ministry of Energy and Minerals of the Sultanate of Oman. He also serves as the Coordinator of Oman's National Hydrogen Alliance (Hy-Fly) and holds the role of senior energy renewal advisor with Petroleum Development Oman (PDO), focusing on new energy policy and regulation. Dr. Khalil also serves as advisory board member to Muscat University College of Engineering.

With a Ph.D. in Sustainable Energy Technologies from the University of Nottingham, UK, Dr. Khalil has over 19 years of experience in the energy sector. His expertise ranges from traditional oil and gas engineering and operations to new energy business development, emerging energy technologies, technology management, technology planning, and new energy policy, regulation, and strategy development.

Dr. Khalil has made significant contributions to various energy transition strategies, policies, and studies, including Oman's national hydrogen economy strategy study, PDO strategy refresh, Oman national energy master plan, and Oman's energy transition policy framework.
